

Vet. medicine.

General and Systemic Vet. Medicine.

General:

Applicable for most diseases.

→ eg antipyretics.

Systemic:

Applicable for specific systems.

→ eg Nervous, reproductive etc.

Lecture 2:

Fever. and

Hyperthermia

High temp

High temp.

↳ caused by

→ Due to

Bacterial

high environmental temperature.

Viral → Toxins (immunostimulants)

→ No antibiotic or antipyretics used.

Fungal

Protozoal → Anti-Protozoals

→ Multivitamins, trace and IV fluids are used.

→ 104°F → Bacterial → Antibiotic

→ $105^{\circ}\text{--}107^{\circ}\text{F}$ → Protozoal

→ Viral → No specific treatment.

↳ Antibiotic for enteric infection

→ Slight abd water med (orally)

* ~~Swelling~~ Swelling of organs indicate increased load of infective organism.

* Inguinal and Femoral lymph nodes.

* Parotid ^{L.N.} behind ear and Maxillary L.N.

* Subscapular lymph node swell in Thelazia.

* Virus compromise immune system which lead to enteric bacterial infection by beneficial bacteria.

* Textbook of Vet. Medicine by Dr. Mumtaz

* Toxins affect Lungs (Bronchoconstriction), heart (vasodilation) and Brain. Adrenaline is

... steroids are also used.
